

[2] データの型と演算

演習03 以下の演算を行うと, それぞれの変数はどのような値になるか考えよ.

```
int a,b,c;  
a=10;  
b=3;  
c=a+b;
```

```
int a,b,c;  
a=10;  
b=3;  
c=a/b;
```

```
int a,b,c;  
a=3/2;  
b=3.0/2;  
c=2.0/3.0;
```

```
double a,b,c;  
a=3/2;  
b=3.0/2;  
c=2.0/3.0;
```

```
int day, year;  
year=1;  
day=year*365+1;  
year=year+1;
```

```
int a=5,b=4;  
a=a-10;  
b=b/2;
```
